

Stone Fruit

Stone fruit

Medium Tree

Deciduous

Flowering: Yes

Colour

Many stone fruit trees can be grown successfully in gardens including:

- Almonds
- Apricots
- Cherries
- Nectarines
- Peaches
- Plums

All of which are best grown in full sun and prefer well-drained soil.

They also provide beautiful ornamental value with stunning blossom in spring.

Where growing conditions are not favourable, large tubs or pots may be preferable.
