Water Proofing the South Stage2 – Council's Role

4 pages

OUR ROLE

Leadership

Council providing leadership by demonstrating best practice in water conservation, protection of water quality and ecosystem health and by promoting innovative and integrated water management solutions that help meet relevant water resource targets.

Owner/custodian

Council reducing its water consumption and effectively manage watercourses, water dependent ecosystems, waste water and stormwater infrastructure under its care and control.

Regulatory

Council enforcing the relevant provisions of statutes including the **Public and Environmental Health Act, Local Government Act** and other relevant legislation accepted by Council under delegation. Council using its role as a local planning authority under the **Development Act** to promote sustainable urban design and water management.

Information provider

Council distributing information on water management issues and opportunities to conserve and reuse water.

Advocate

Council lobbying State and Federal Governments to clarify water management roles and responsibilities and promote water conservation and pollution prevention by business, industry and the community.

Initiator/facilitator

Council bringing together stakeholders, or joining with other stakeholders, to collectively pursue a shared interest or service or to resolve an issue.

Agent

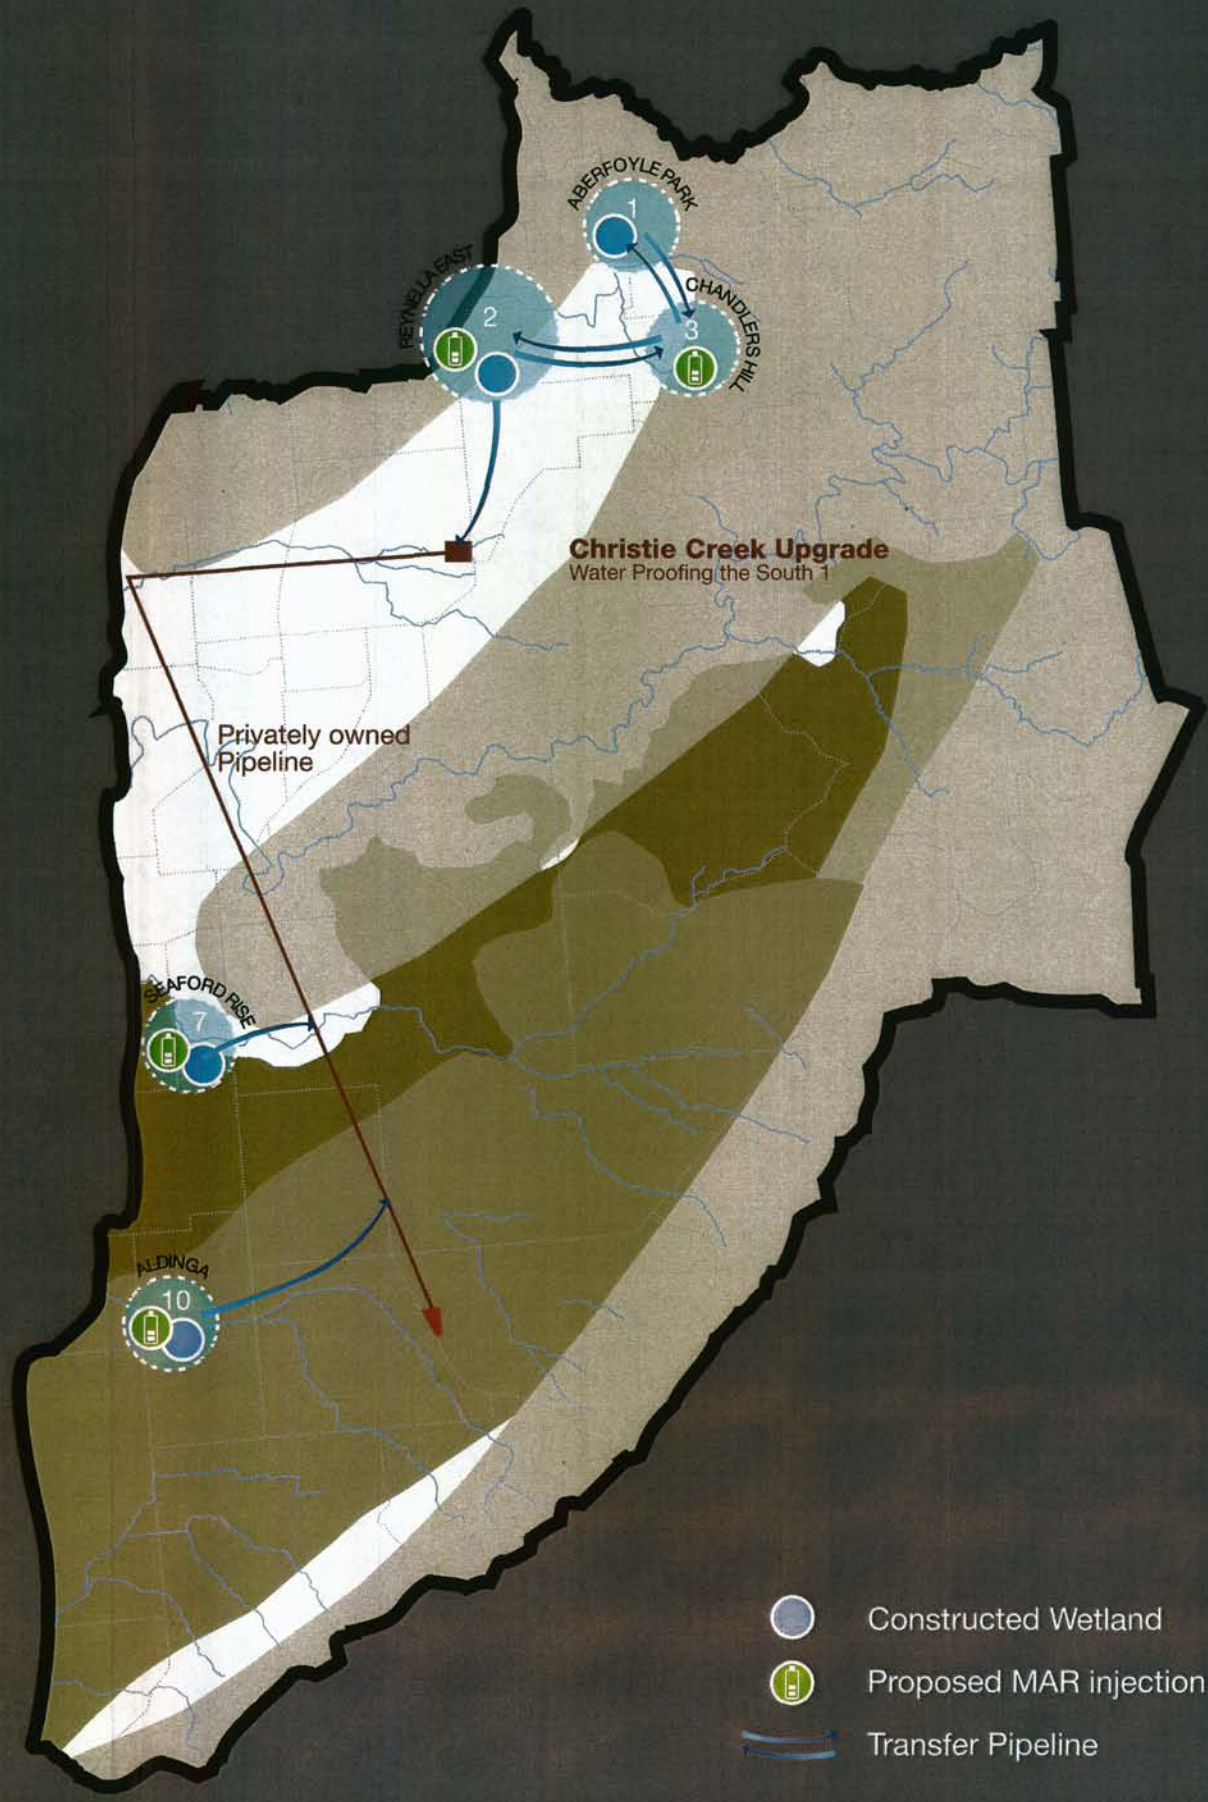

Council providing a service on behalf of another party that funds the service, when the associated funding conditions accord with Council's own directions.

Part funder

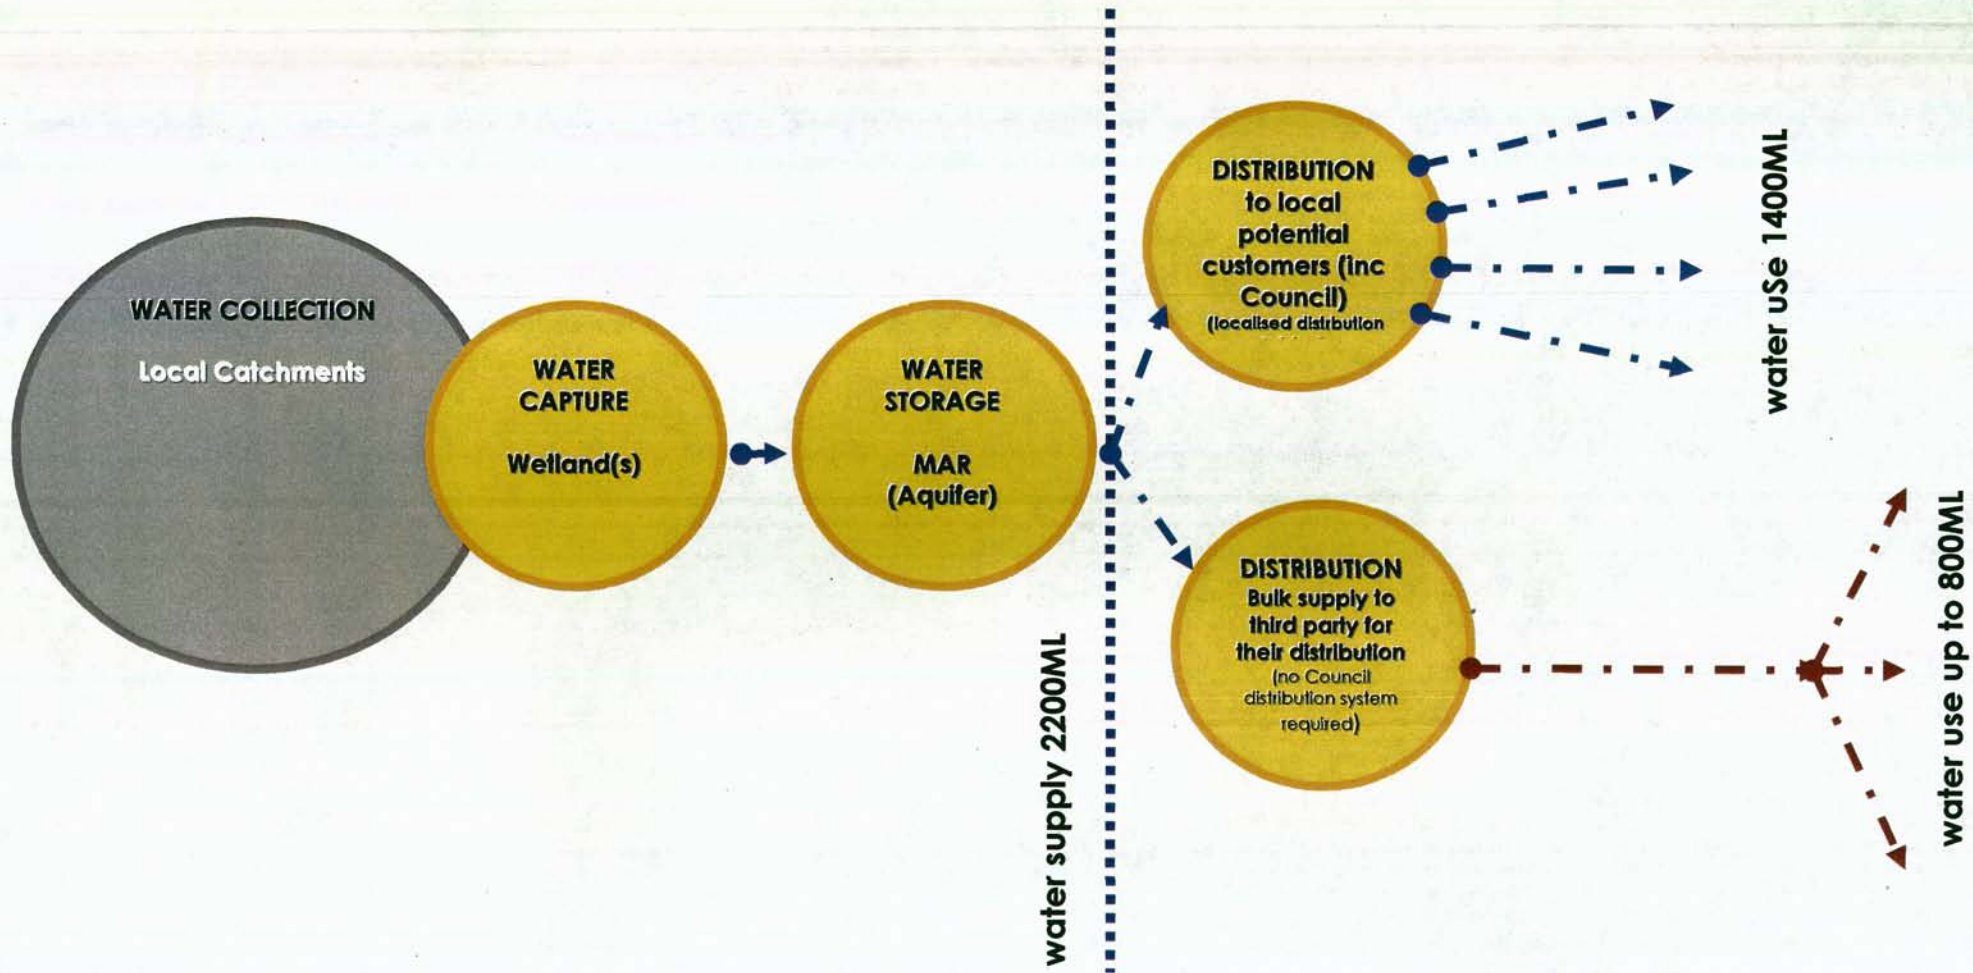

Council contributing funds or resources, as one of a number of parties that contribute funds (or resources), towards an initiative or service.

Direct service provider

Council managing drainage systems, effluent disposal systems and to encourage water sensitive urban design.

DELIVERY MODEL 1: Council distributes to local customers and bulk supplies to third party distributor

DELIVERY MODEL 2: Bulk supply for third party distribution
